### 3. Reducing Youth Offending and Re-offending in General

\*Please note the adult re-offending rate has been unusually low since April 2015. In April 2015 there was a change in force business processes which appeared to affect the amount of crimes which were solved by the force. As the process changes have been successfully adopted by the force, we have seen an increase in the proportion of the crime solved since April 2015.
