# Police and Crime Plan 2016-2020 Monthly Performance Update

January 2020

National and MSG positions are to 31st December 2019 (Essex Police data are to 31st January 2020).

Version 1.5
Produced February 2020
Performance Analysis Unit, Essex Police
Sensitivity: Official

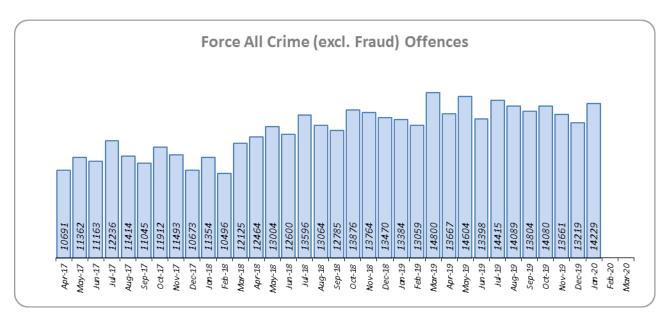

## **Executive Summary**

- Three of the seven PFCC Priorities for Essex Police have been given a recommended grade of "**Good**". Recommended grades have been determined with reference to comparisons with Essex Police's Most Similar Group (MSG) of forces, internal Key Performance Indicators (KPIs), and professional judgement.
- Four of the seven PFCC priorities 1 (More local, visible and accessible policing), 3 (Breaking the cycle of domestic abuse), 4 (Reverse the trend in serious violence) and 6 (Protecting children & vulnerable people) have been given a recommended grade of "Requires Improvement". None of these recommended grades have changed since the July 2019 report.
- All Crime has risen by 10.3% for the 12 months to January 2020 compared to the 12 months to January 2019. The increase in offences can, in part, be attributed to changes to Home Office Counting Rules in relation to Stalking & Harassment, as well as better Crime Data Accuracy (CDA).
- Essex Police solved 254 more crimes in the 12 months to January 2020 compared to the 12 months to January; this equates to a 1.1% increase. However, the All Crime solved rate continues to decline due to the increase in the number of crimes reported. The solved rate is currently 13.5%.
- Confidence (Essex Police internal survey) is at 65.2% (results to the 12 months to September 2019). Compared to year ending September 2018, confidence in the local police has significantly decreased (deterioration of 2.8% points). Confidence in the local police from the Crime Survey of England and Wales (CSEW) places Essex eighth in its MSG, and 10.7% points below the MSG average.
- Offence types Rape and Possession of Drugs experienced statistically significant changes for the month of January 2020. Rape experienced a 34.8% increase (550 more offences) for the 12 months to January 2020 compared to the 12 months to January 2019. Possession of Drugs experience a 56.0% increase (1,767 more offences) for the 12 months to January 2020 compared to the 12 months to January 2019.

## Priority 1 - More local, visible and accessible policing

## **Grade: Requires Improvement**

Police Priority Indicators	12 months to January 2019	12 months to January 2020	Number	% Difference		MSG Ave per 1,000 pop.		Essex MSG Position
Number of all crime offences	153,239	168,975	15,736	10.3	92.8	78.8	14.0	8

Essex experienced a 10.3% increase in All Crime (15,736 additional offences) for the 12 months to January 2020 compared to the 12 months to January 2019. Essex is eighth in its Most Similar Group of forces (MSG) for crime per 1,000 population.

The increase in offences can, in part, be attributed to changes to Home Office Counting Rules in relation to Stalking & Harassment, as well as better Crime Data Accuracy (CDA).

Essex was graded as Outstanding in its recent HMICFRS Crime Data Integrity (CDI) inspection. Essex Police is only the third force of the 41 that have been judged as outstanding on the first visit in this inspection programme.

## Priority 1 - More local, visible and accessible policing

## **Grade: Requires Improvement**

Police Priority Indicators	12 months to Sept 2018	12 months to Sept 2019	% pt. Difference	% Difference
Percentage of people who have confidence in policing in Essex (internal survey Q13b)	68.0	65.2	-2.8	-
Confidence Interval	1	1.1		

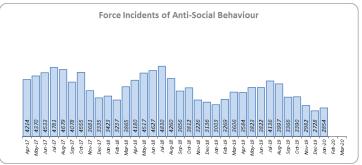

Police Priority Indicators	12 months to Sept 2018	12 months to Sept 2019	Number	% Difference	Essex	MSG Ave	# diff.	Essex MSG Position
Confidence in the local police (Crime Survey of England and Wales)	50.4	45.0	-5.4	-	45.0	55.7	-10.7	8
Confidence	Interval 4.3	3.5			3.5	1.6		

Confidence (Essex Police internal survey) is at 65.2% (results to the 12 months to September 2019). Compared to year ending September 2018, confidence in the local police has significantly decreased (deterioration of 2.8% points).

Confidence in the local police from the Crime Survey of England and Wales (CSEW) places Essex eighth in its MSG, and 10.7% points below the MSG average. However, the sample size from this survey is not representative at a sufficiently small scale to measure local issues. The Essex Police internal survey (results detailed above) was therefore introduced to achieve a more accurate local measure with a small margin of error. The results from the Essex Police survey show that the Force performs significantly better on confidence in local policing than the results from the CSEW, which asks the same question.

Due to the fact that Essex is 8<sup>th</sup> in its MSG for both crime per 1,000 population and for confidence in local police (CSEW), and that the Essex Police internal survey shows a deterioration in confidence in local police, a grade of Requires Improvement is recommended.

Police Priority Indicators	12 months to January 2019	12 months to January 2020	Number Difference	% Difference
Number of anti-social behaviour incidents	46,683	41,835	-4,848	-10.4

Police Priority Indicators	12 months to Sept 2018	12 months to Sept 2019	Number	% Difference	Essex	MSG Ave	# diff.	Essex MSG Position
ASB Perception:- Perception that ASB is a problem (CSEW)	6.6	3.6	-3.0	-	3.6	4.7	-1.1	2
Confidence Interval	4.6	2.6			2.6	1.3		

Police Priority Indicators	12 months to Sept 2018	12 months to Sept 2019	% pt.	% Difference
Percentage of people who have confidence Essex Police and the organisations they work with are dealing with ASB (internal survey Q8a)	66.9	63.0	-3.9	-
Confidence Interval	1.1	1.2		

Essex experienced a 10.4% reduction (4,848 fewer) in Anti-Social Behaviour (ASB) incidents for the 12 months to January 2020 compared to the 12 months to January 2019. Part of this decrease is due to better Crime Data Accuracy (CDA); more incidents reported as ASB are now being correctly recorded as crimes. Some of the decrease may also be due to people reporting incidents directly to the Council and Housing Authorities.

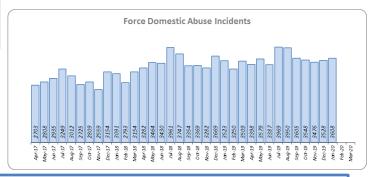

ASB Perception (from the Crime Survey of England and Wales) in Essex experienced a 3.0% point decrease (improvement). Essex is 1.1% points better than the MSG average; this places Essex second in its Most Similar Group of forces. However, results of Essex's internal survey significantly decreased in relation to how well Essex and the organisations they work with deal with ASB (deterioration of 3.9% points).

Due to the reduction in ASB incidents, and the fact that ASB Perception is better than the MSG average, a grade of Good is recommended.

## **Priority 3 - Breaking the cycle of domestic abuse**

Police Priority Indicators	12 months to January 2019	12 months to January 2020	Number Difference	% Difference
Number of incidents of domestic abuse	41,028	42,807	1,779	4.3
Number of repeat incidents of domestic abuse	18,513	20,693	2,180	11.8

Police Priority Indicators	12 months to January 2019	12 months to January 2020	Number Difference	% Difference
Percentage of domestic abuse offences solved	13.5	10.0	-3.5	-
Total domestic abuse offences solved	3,323	2,987	-336	-10.1
High Risk domestic abuse offences solved	891	754	-137	-15.4
Medium Risk domestic abuse offences solved	1,099	965	-134	-12.2
Standard Risk domestic abuse offences solved	1,162	1,113	-49	-4.2

Essex experienced a 4.3% increase (1,779 more) in Domestic Abuse incidents and a 11.8% increase (2,180 more) in repeat incidents of Domestic Abuse for the 12 months to January 2020 compared to the 12 months to January 2019. The increase in crime, in part, can be attributed to better Crime Data Accuracy (CDA), and changes to Home Office Counting Rules (HOCR) in relation to Stalking & Harassment.

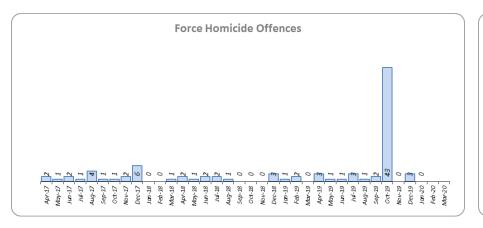

The Domestic Abuse solved rate fell by 3.5% points to 10.0% during the same period. The number of offences solved has also fallen by 336 offences.

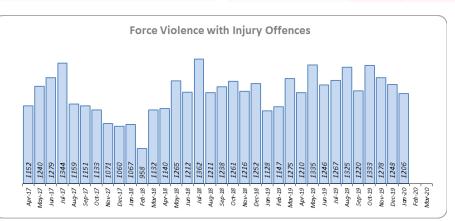

Due to the increase in repeat incidents and the decrease in both the solved volume and the solved rate, a grade of Requires Improvement is recommended.

#### **Priority 4 - Reverse the trend in serious violence**

#### **Grade: Requires Improvement**

Police Priority Indicators	12 months to January 2019	12 months to January 2020	Number Difference	% Difference		MSG Ave per 1,000 pop.		Essex MSG Position
Number of homicides	14	59	45	321.4	0.034	0.011	0.022	8
Number of violence with injury offences (new definition from Nov 2017)	14,383	15,417	1,034	7.2	8.498	8.398	0.100	5

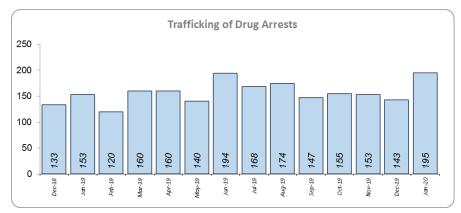

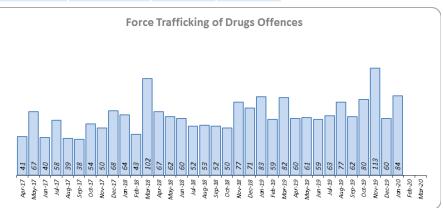

Essex saw an increase of 45 Homicides (to 59 offences) for the 12 months to January 2020 compared to the 12 months to January 2019. This includes the tragic incident where 39 Vietnamese nationals were discovered in a lorry trailer in Grays. Essex is eighth in its Most Similar Group (MSG) of forces for offences per 1,000 population, and is higher than the MSG average.

There was a 7.2% increase (1,034 more offences) in Violence with Injury. Essex is fifth in its MSG for offences per 1,000 population, and is slightly worse than the MSG average. The increase in this offence is, in part, due to the rise in domestic abuse related Violence with Injury (14.0% increase, 672 more offences); 35.4% of Violence with Injury is domestic abuse-related.

Due to the fact that Essex continues to experience an increase in Violence with Injury, a grade of Requires Improvement is recommended.

Police Priority Indicators	12 months to January 2019	12 months to January 2020	Number Difference	% Difference
Number of Organised Criminal Group disruptions*	8	5	-3	-37.5
Trafficking of drugs arrests	1,493	1,972	479	32.1

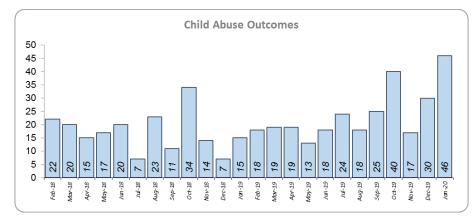

Five Organised Crime Group (OCG) disruptions were conducted in Essex in January 2020 compared with eight in January 2019 (three fewer).\* In January 2019 there was a change in the way in which the number of OCG disruptions were counted; this follows National Crime Agency (NCA) and Eastern Region Special Operations Unit (ERSOU) guidance to ensure that all forces record disruptions in the same way.

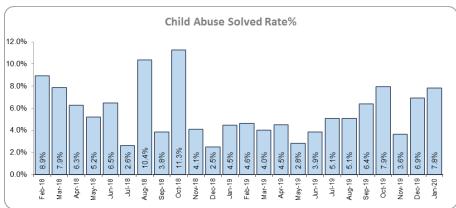

Trafficking of drug arrests, which are also as a result of police proactivity, increased by 32.1% (479 more) for the 12 months to January 2020 compared to the 12 months to January 2019. In the same period, 21.0% more trafficking of drugs offences have been recorded (157 more offences to 906).

Due to the increase in Trafficking of Drug Arrests, a grade of Good is recommended.

\*Please note that the number of Organised Crime Group disruptions are a comparison of January 2019 and January 2020, as there was a change in the method by which these disruptions were counted from January 2019.

Police Priority Indicators	12 months to January 2019	12 months to January 2020	Number Difference	% Difference
Number of child abuse outcomes	210	291	81	38.6
Child abuse solved rate	6.1	5.3	-0.9	-

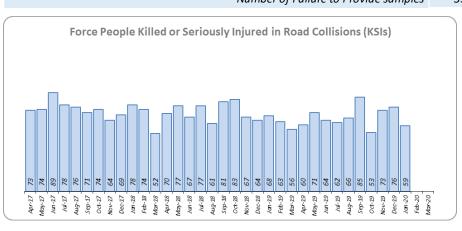

There was a 38.6% increase (81 more) in the number of solved Child Abuse Outcomes in the 12 months to January 2020 compared to the 12 months to January 2019.

61.2% more offences (an additional 2,091) were recorded in the 12 months to January 2020 compared to the 12 months to January 2019. There was a 0.9% point decrease in the solved rate (from 6.1% to 5.3%).

In spite of the increase in the number of Child Abuse solved outcomes, there is still a reduction in the solved rate. A grade of Requires Improvement is therefore recommended.

Police Priority Indicators	12 months to January 2019	12 months to January 2020	Number	% Difference	Essex (per 100 million km)	MSG Ave (per 100 million km)	# diff.	Essex MSG Position
All people killed or seriously injured (KSI) in road collisions	859	818	-41	-4.8	Data to	Data to		
Number of driving related mobile phone crime on Essex roads	2,786	1,738	-1,048	-37.6	2018	December 2018		
Number of driving under the influence of drink and/or drugs on Essex roads	2,806	3,715	909	32.4	2010	2010		
Number of driving under the influence of drink on Essex roads	1,346	1,479	133	9.9				'
Number of driving under the influence of drugs on Essex roads	1,130	1,826	696	61.6	1.287	1.102	0.185	6
Number of Failure to Provide samples	330	410	80	24 2				

Rolling 12 months	12m to Jan 19	12m to Jan 20	Number Diff	% Diff
KSI - All	859	818	-41	-4.8%
KSI - Fatalities	47	43	-4	-8.5%
KSI - Serious injuries	812	775	-37	-4.6%
Number of Collisions	859	804	-55	-6.4%

There was a 4.8% decrease (41 fewer) in the numbers of those Killed or Seriously Injured (KSI) in Essex for the 12 months to January 2020 compared to the 12 months to January 2019. Please note most KSIs do not result in a criminal offence of death or serious injury caused by dangerous driving and are recorded as road traffic incidents. Essex is placed sixth in its Most Similar Group (MSG) of forces for casualties per 100 million vehicle kilometres (results to December 2018).

There has been a 37.6% decrease in mobile phone crime (1,048 fewer offences) and a 32.4% increase (909 more offences) in drink/drug driving with drug driving seeing a 61.6% increase (696 more).

Due to the decrease in KSIs, a grade of Good is recommended. As of December 2018, Essex was slightly worse than the MSG average per 100 million km. However, due to the fact that more recent national figures have not been released, the current position cannot be updated. The date of the next national release has not yet been confirmed.

#### **Monthly Performance Overview: Exceptions**

#### **Exceptions Overview**

The following offence types experienced statistically significant changes for the month of January 2020: Rape and Possession of Drugs.

#### Rape

34.8% increase (550 more offences) for the 12 months to January 2020 compared to the 12 months to January 2019; there were statistically exceptionally increases in five Districts in January 2020. There has not been a exceptional increase in Rape since July 2019.

The increase in all five Districts showing an exceptional increase was in Rape Over 16 years (the other category of Rape is Under 16). The proportion of DA Rape in the 12 months to January 2020 has increased compared to the 12 months to January 2019 (by 4.5 percentage points: 35.2% compared to 30.7%), as has the proportion of non-recent\* offences (from 41.0% to 45.1%).

\* Offences reported over 28 days after the committed date.

#### **Possession of Drugs**

56.0% increase (1,767 more offences) for the 12 months to January 2020 compared to the 12 months to January 2019. The Force saw a statistically exceptional increase in the month of January 2020. Cannabis has seen the largest numerical increase 1,613 (62.6% more); the proportion has also risen from 80.9% to 84.7% of all possession of drugs. This increase is likely to be attributed to an increased use of Stop and Search powers as part of pro-active police activity.

#### **2016-2020** Police and Crime Plan Performance Indicators

Table 1

Police and Crime Plan Priorities	Police Priority Indicators	12 months to January 2019	12 months to January 2020	Number Difference	% Difference	Direction of Travel
	Percentage of people who have confidence in policing in Essex (internal survey Q13b) <sup>1</sup>	68.0	65.2	-2.8	-	Deteriorating
Priority 1 - More local, visible	Confidence Interval <sup>2</sup>	1.0	1.1			
and accessible policing	Confidence in the local police (CSEW) <sup>3</sup>	50.4	45.0	-5.4	-	Deteriorating

children & vulnerable people	Child abuse solved rate	6.1	5.3	-0.9	-	Deteriorating
Driarity 7 Impraya cafaty an	Number of driving related mobile phone crime on Essex roads	2,786	1,738	-1,048	-37.6	Improving
Priority 7 - Improve safety on our roads	Number of driving under the influence of drink and/or drugs on Essex roads	2,806	3,715	909	32.4	Deteriorating
our rodus	All people killed or seriously injured (KSI) in road collisions <sup>7</sup>	859	818	-41	-4.8	Improving

Please note that the number of Organised Crime Group disruptions are a comparison of January 2019 and January 2020, as there was a change in the method by which these disruptions were counted from January 2019.

Please view above table with the explanations and caveats detailed on page 13.

#### **End Notes**

- <sup>1</sup>Question from Essex Police's own confidence and perception survey (Question 13b). Results are for the period 12 months to September 2019 versus the 12 months to September 2018.
- <sup>2</sup> The confidence interval is the range +/- between where the survey result may lie. This is mainly influenced by the number of people answering the survey. The more people that answer the survey, the smaller the interval range.
- <sup>3</sup> Crime Survey for England and Wales (CSEW): 12 months to September 2019 vs. 12 months to September 2018.
- <sup>4</sup> Question from Essex Police's own confidence and perception survey (Question 8a). Results are for the period 12 months to September 2019 versus the 12 months to September 2018.
- <sup>5</sup> Please note that the number of Organised Crime Group disruptions are a comparison of January 2019 and January 2020 only due to a change in counting rules that occurred in January 2019.
- From January 2019, activity has been recorded rather than the number of people arrested. If there was a day of action, for example, and five people were arrested, this would formerly have counted as five disruptions, but now will count as one. The change stems from confusion over the previous guidelines, with police forces counting disruptions in different ways.
- <sup>6</sup> Solved outcomes are crimes that result in: charge or summons, caution, crimes taken into consideration, fixed penalty notice, cannabis warning or community resolution.
- <sup>7</sup> 'Killed or Seriously Injured' (KSI) refers to all people killed or seriously injured on Essex's roads, regardless of whether any criminal offences were committed. 'Causing Death/Serious Injury by Dangerous/Inconsiderate Driving' offences (detailed on p.14) refers to the number of crimes of this type.
- <sup>8</sup> Please note that on Wednesday 23 October 2019 the bodies of 39 Vietnamese nationals were discovered in a lorry trailer in Grays. This tragic incident is reflected in the Homicide numbers.
- <sup>9</sup> Recorded Crime Outcome 20 (Further action resulting from the crime report will be undertaken by another body or agency subject to the victim (or person acting on their behalf) being made aware of the action to be taken) and Outcome 22 (Diversionary, educational or intervention activity, resulting from the crime report, has been undertaken and it is not in the public interest to take any further action)

Crime Severity Score (CSS) - Based on the ONS Crime Severity Score which replaces the Cambridge Harm Index - data are for the financial year 2018/19, (a total of 21 crime types have been ranked where scores are available).

The CSS excludes proactively generated crime detection by police i.e. State Based Crime, as these offences do not reliably measure harms experienced by the population. Rather, they measure the resources invested in catching offenders.

Yr on Yr 1m %/% pt. diff. - compares the month of January 2020 with the month of January 2019.

Yr on Yr 3m %/% pt. diff. - compares the three months to January 2020 with the three months to January 2019.

**2 Score** - Standard Score over 1.96 or under -1.96. Standard Scores are used to calculate the probability of an event occurring within a normal distribution; they are also used to compare two scores from different normal distributions (for example the number of affences per police District). In this document, Standard Scores are calculated in the following way: (current month's figure, minus the average figure per month over the previous three years) divided by the Standard Deviation of the same three year period. Standard Deviation is a measure to determine how spread out figures are from the average or "mean" a large standard deviation indicates the data is widely spread; if small, the data will be more clustered together.
