

Performance and Resources Scrutiny Programme 2022/23

Report to: the Office of the Police, Fire and Crime Commissioner for Essex

Title of Report:	Use of Force/Stop & Search – Q1 2022/23
Classification of Paper:	Official
Agenda Number:	6.0
Chief Officer	T/ACC Glen Pavelin
Date Paper was Written	18/07/2022
Version Number	1.4
Report from:	Essex Police
Date of Meeting:	25/08/2022
Author on behalf of Chief Officer:	Dan Youngman 42078817
Date of Approval:	COG – 27/07/2022

1.0 Purpose of Report

To provide a quarterly update on Essex Police's use of force and stop and search powers.

2.0 Recommendations

There are no recommendations. This report is for the board to note.

3.0 Executive Summary

Use of Force

There were 5,872 instances of Use of Force were recorded in Essex during Q1 2022/23. This is an increase of 87 (1.5%) additional forms completed, compared to the same quarter for the 2021/22, and a 2.4% increase on the previous quarter.

3,994 forms (68.0%) involved the use of either compliant or non-compliant handcuffs.

17 forms showed Firearms as a first tactic, an increase of two from last quarter. All Firearms use forms refer to a total of 14 separate incidents (two fewer than the previous quarter).

136 uses of Taser that have been recorded as a first tactic in this quarter (21 more than the previous quarter). All Taser use refers to 228 separate incidents (75 more than the previous quarter), this is the second consecutive quarter of growth in Taser incidents.

74.4% of subjects on Use of Force records were male. 37.0% of all subjects are male and in the 18-34 age range, with the average age being 32 years old.

The proportion of subjects from Ethnic Minorities continues to be higher than the proportion within the population of Essex as a whole. 10.6% of subjects against whom force was used were Black. This is 8.4 percentage points higher than the 2.2% Black resident population proportion in Essex (2019 ONS mid-year estimate).

53.3% of reasons for the use of force are to prevent harm to people or property. Mental Health continues to be the highest Impact Factor.

The tactics most likely to cause injury to subjects are Baton Used (66.0% for minor injury) and Dog Bite (33.3%), Taser as a tactic is unlikely to cause injury to the subject (9.0%), however this rises to 46.7% if the Taser is fired.

Stop and Search

There were 4,107 stops recorded in Quarter 1 of 2022/23. This is a decrease of 4.2% (180 records) on the previous quarter and a 12.0% decrease (558 records) on the equivalent quarter last year. It seems likely that the volume of stops will continue at similar levels without an outside influence, such as a large operation or further pandemic restrictions, to drive volumes up or down.

According to the SMSR survey 67.7% of respondents agree that Essex Police use Stop Search powers fairly and respectfully. This falls to 52.6% for respondents from Ethnic Minorities.

96.6% (3,967) of stops in the last quarter were PACE and Misuse of Drugs Stops. There were 99 Section 60 Stops in Q1.

The peak age range for those stopped is 18-24, equating to 1,339 stops in the last quarter (32.6% of subjects) with 85.5% of subjects being male.

There were 3.2 Stops per 1000 people on individuals from Ethnic Minorities in Essex last quarter, this compares to 1.5 Stops per 1000 for White individuals. This means that an individual from an Ethnic Minority is just twice as likely to be stopped than a white individual. This disparity varies throughout the districts and is highest in Rochford and lowest in Thurrock.

The quarterly EDIC (Equality, Diversity, Inclusion and Cohesion) Board looks at the position of Essex Police in relation to its Most Similar Group, Essex currently performs favourably when compared to similar forces.

For Q1 2022/23, 29.0% of Essex outcomes were positive which is 1.8 percentage points lower than the MSG average. During the last quarter Positive outcomes on

individuals from Ethnic Minorities were 0.5 percentage point higher than for White individuals.

4.0 Introduction/Background

This report discusses the Use of Force forms and stop searches submitted for incidents occurring between 1st April and 30th June 2022.

The Use of Force data analysed in this report contains duplicates, as one form should be submitted per officer for each use of force. Therefore, if three officers use force against one subject in relation to the same incident, three forms should be submitted, and the subject would appear three times in the data (for that one incident).

Stop Searches are now recorded on two separate databases, the Stops Database that has been used up to now and the MobileFirst system (which is also used for the Use of Force data).

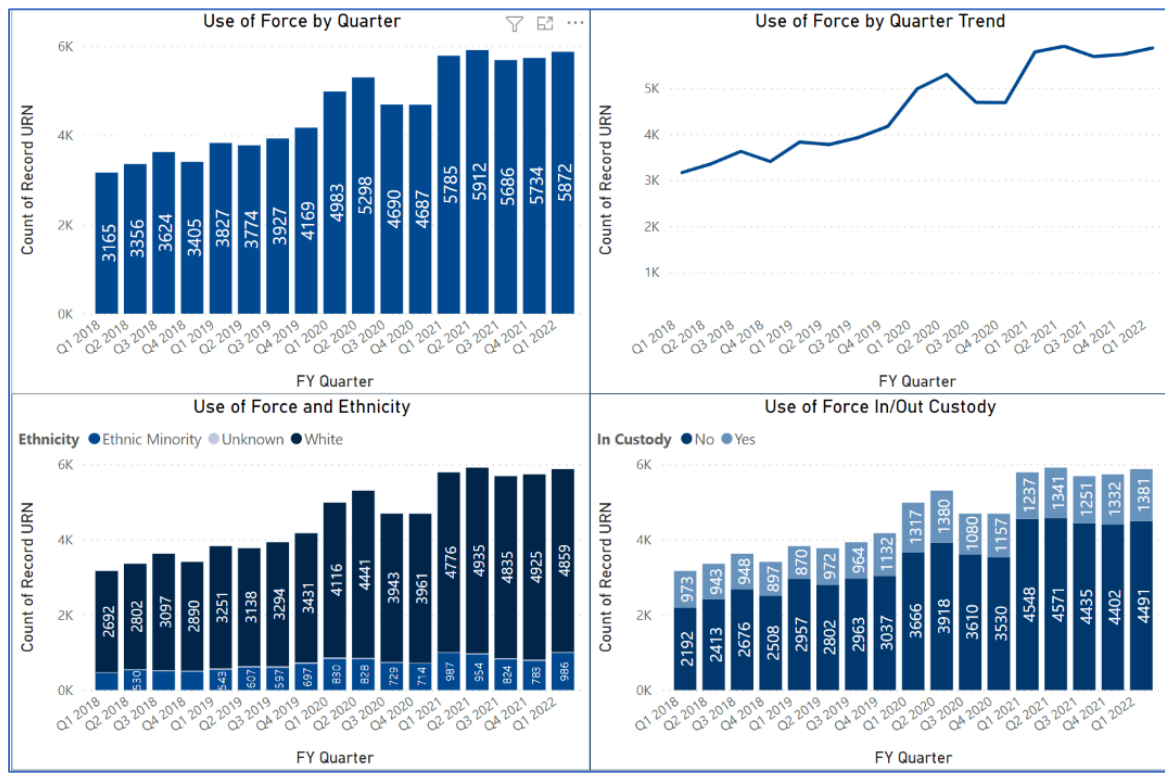

The Office of National Statistics has released 2019 mid-year population estimates with enough granular detail to be used for disproportionality at District level. This report uses that data instead of the 2011 Census.

Ethnicity data from the 2021 Census is due to be published by the ONS in October or November 2022

For the purposes of this report, the term Ethnic Minorities is used to describe all minorities other than White minorities. White minorities are included in White.

5.0 Current Work and Performance

Use of Force

There were 5,872 instances of Use of Force were recorded in Essex during Q1 2022/23. This is an increase of 87 (1.5%) additional forms completed, compared to the same quarter for the 2021/22, and a 2.4% increase on the previous quarter. The proportion of force being used in custody remains stable. In the last quarter it was 23.5% compared to the 8-quarter average of 23.3%.

The below table details the tactics employed with each Use of Force in Q1 2022/23. It details the first eight tactics employed (not necessarily the most severe), and more than one will have been used in most incidents. The MobileFirst app allows for the inputting of up to 20 Tactics for one incident, there were no forms in this quarter in which more than eight tactics were detailed.

Compliant Handcuffing continues to be the most commonly used tactic both overall and in the first used tactic.

In 76 reports, Tactical Communications (Tac Comms) were the only method employed, suggesting further training on the app may be required, as a form is not required when Tac Comms are the only method. This is five reports more than the previous quarter.

68.8% of forms did not state that Tac Comms were used as a first tactic. It is unlikely that this is the case, it is inferred that officers simply did not enter Tac Comms as a tactic used.

OFFICIAL

Tactic	Tactic 1	Tactic 2	Tactic 3	Tactic 4	Tactic 5	Tactic 6	Tactic 7	Tactic 8	Tactic Count	%age of Tactics
Compliant Handcuffing	1891	520	76	18	4	2	0	0	2511	23.07%
Tactical Communication	1641	356	119	44	20	6	0	0	2186	20.08%
Unarmed skills	507	561	262	93	29	9	4	1	1466	13.47%

Non-Compliant Handcuffing	659	434	291	83	10	4	2	0	1483	13.62%
Other / improvised	293	345	172	85	30	7	4	0	936	8.60%
Limb / Body Restraints	168	201	116	68	21	7	0	0	581	5.34%
Taser	136	72	6	5	1	3	0	0	223	2.05%
Baton drawn	12	7	2	1	1	0	0	0	23	0.21%
Spit guard	18	25	19	25	13	7	1	0	108	0.99%
Dog Deployed	4	7	0	0	0	0	0	0	11	0.10%
CS PAVA drawn	14	16	8	5	1	1	0	0	45	0.41%
CS PAVA used	14	9	7	6	2	1	0	0	39	0.36%
Firearms	17	4	1	0	0	0	0	0	22	0.20%
Baton used	1	1	1	1	1	0	0	0	5	0.05%
Shield	5	7	1	0	1	0	0	0	14	0.13%
Dog Bite	4	1	1	0	0	0	0	0	6	0.06%

3,994 forms (68.0%) involved the use of either compliant or non-compliant handcuffs.

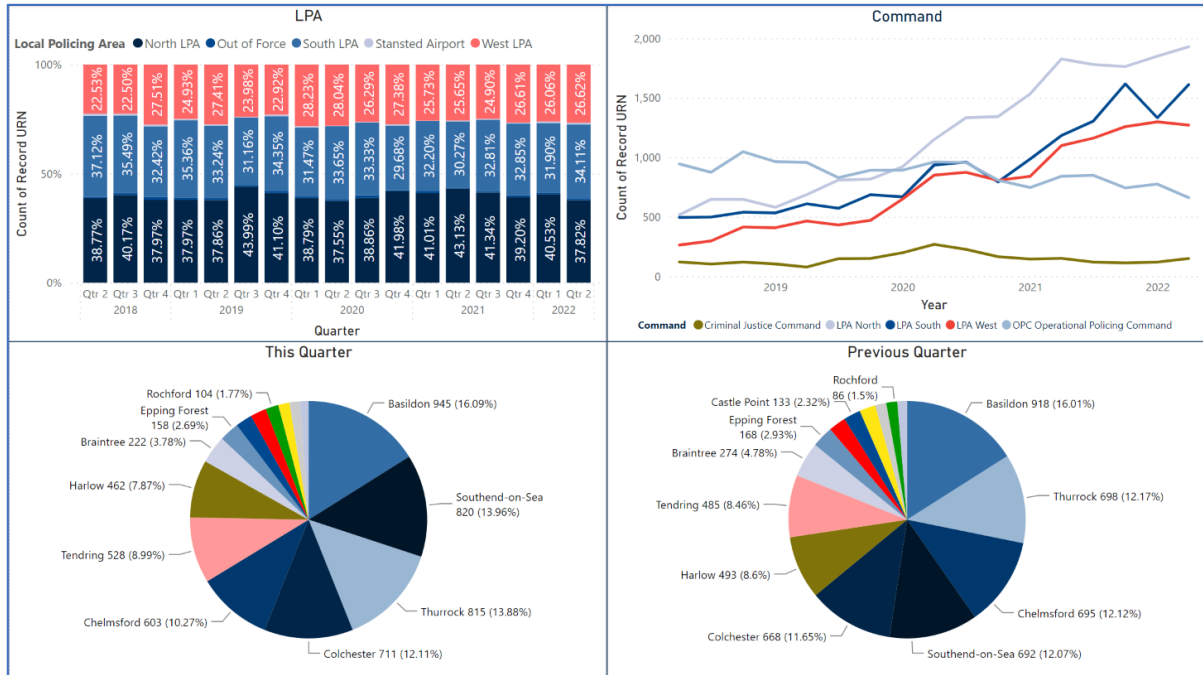

17 forms showed Firearms as a first tactic, an increase of two from last quarter. All Firearms use forms refer to a total of 14 separate incidents (two fewer than the previous quarter).

No injuries were recorded in forms that included Firearms as a tactic for the last quarter. Further analysis has revealed some potential data quality issues – one form shows a firearm was fired but Firearms is not listed as a tactic used; 45 forms show a firearm was aimed but do not list Firearms as a tactic used.

136 uses of Taser that have been recorded as a first tactic in this quarter (21 more than the previous quarter). All Taser use refers to 228 separate incidents (75 more than the previous quarter), this is the second consecutive quarter of growth in Taser incidents.

Tactic Number	Total Taser Tactics	Total Effective	%age Effectiveness
1	136	120	88.2%
2	72	62	86.1%
3	6	5	83.3%
4	5	5	100.0%
5	1	1	100.0%
6	3	3	100.0%
Total	223	196	87.9%

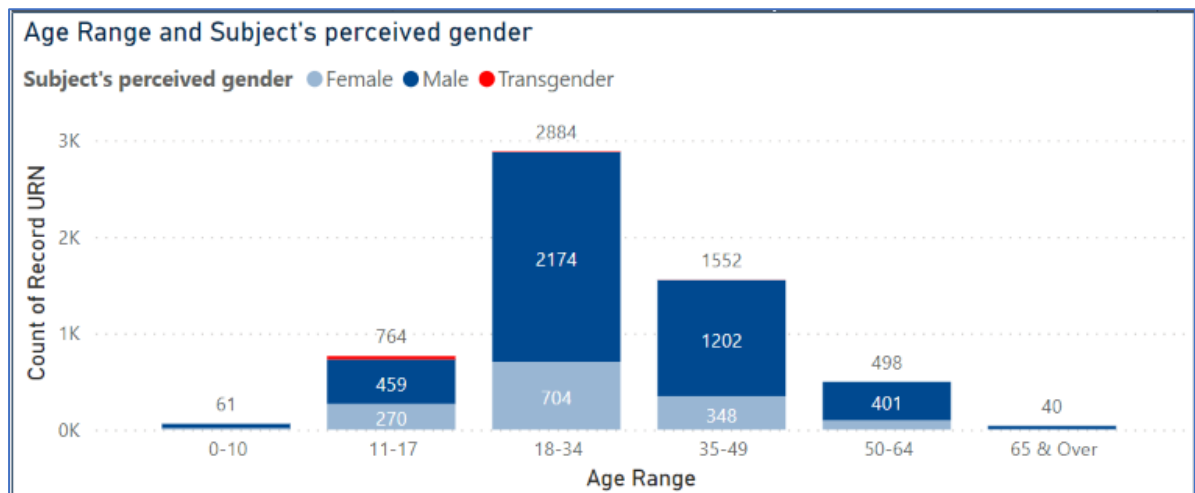

After each Tactic entered on a Use of Force form, the officer records whether the tactic has been effective. Using this data, Taser tactics are 87.9% effective. The effectiveness of Taser tactics increases for later tactics.

Historically Colchester, Basildon, Southend, Thurrock, Chelmsford, Harlow and Tendring are the districts that account for most use of force. These seven districts accounted for the location of 83.2% of all force used. The proportions of location by LPA remain consistent.

When looking at which Commands use force the most¹, the Local Policing Areas and OPC account for 98.0% of all forms recorded in the past quarter. Since the inception of Use of Force forms on Mobile First, all three LPAs have shown an upward trend in the volume of forms submitted by officers, this is a reflection on how technology has improved the ease of reporting in this area and, as a result, improved data quality.

74.4% of those subjected to Use of Force were identified by officers as male, 24.9% were identified as female, this is a slightly higher proportion of Female subjects than the last quarter (21.4%). 43 subjects were identified as transgender.

¹ In order to do this, the Collar Number is looked up on a snapshot of serving officers taken each month. The caveat here is that all figures are based upon where an officer CURRENTLY serves.

32 was the average age for subjects (where a date of birth was given/stated), for males the average is 33 and for females the average age is 30. The mode (age most recorded) is 16 for female subjects and 32 for males. Males with a perceived age between 18-34 years were the most common gender and age band in the review period.

82.7% of subjects were White, this is 9.7 percentage points lower than the proportion of White residents of Essex.

10.6% of subjects against whom force was used were Black. This is 8.4 percentage points higher than the 2.2% Black resident population proportion in Essex (2019 ONS mid-year estimate).

	Use of Force per 1000 population						Ratio to White				
	White	Mixed	Asian or Asian British	Black or Black British	Chinese or Other Ethnic Group	Total Ethnic Minorities	Mixed	Asian or Asian British	Black or Black British	Chinese or Other Ethnic Group	Total Ethnic Minorities
LPA North	2.40	0.92	2.50	27.80	5.14	6.64	0.38	1.04	11.58	2.14	2.77
Braintree	1.31	0.43	3.78	18.31	6.92	5.05	0.33	2.89	13.98	5.28	3.85
Chelmsford	2.97	1.46	3.21	25.45	2.62	6.99	0.49	1.08	8.57	0.88	2.35
Colchester	3.16	0.88	1.37	33.95	5.13	7.67	0.28	0.43	10.74	1.62	2.43
Maldon	1.27	1.63	3.62	18.40	32.26	5.76	1.28	2.85	14.49	25.40	4.54
Tendring	3.47	1.15	5.38	37.58	0.00	7.11	0.33	1.55	10.83	0.00	2.05
Uttlesford	0.63	0.00	0.00	14.39	9.43	2.83	0.00	0.00	22.84	14.97	4.49
LPA South	3.20	2.48	2.38	19.09	14.18	7.65	0.78	0.74	5.97	4.43	2.39
Basildon	4.24	2.46	2.36	22.04	24.96	10.14	0.58	0.56	5.20	5.89	2.39
Castle Point	1.42	1.75	0.00	7.29	0.00	2.25	1.23	0.00	5.13	0.00	1.58
Rochford	0.99	1.66	3.13	24.19	20.83	7.12	1.68	3.16	24.43	21.04	7.19
Southend	4.19	2.88	2.65	16.47	9.71	6.44	0.69	0.63	3.93	2.32	1.54
LPA West	2.99	1.67	2.78	7.76	11.45	4.94	0.56	0.93	2.60	3.83	1.65
Brentwood	1.46	1.18	2.25	11.90	6.01	3.86	0.81	1.54	8.15	4.12	2.64
Epping	1.00	0.58	1.05	6.62	4.11	2.24	0.58	1.05	6.62	4.11	2.24
Harlow	4.82	4.40	2.56	12.69	29.41	7.48	0.91	0.53	2.63	6.10	1.55
Thurrock	4.37	1.33	4.83	6.57	12.36	5.54	0.30	1.11	1.50	2.83	1.27
Force	2.81	1.66	2.72	14.82	9.86	6.42	0.59	0.97	5.27	3.51	2.28

A clearer method to show the ethnic disproportionality for Use of Force is looking at the number of Forms per 1000 population in Essex. From this it is possible to see that individuals from Ethnic Minorities are just twice as likely to have force used upon them than White individuals. This rises to over five times more likely for Black or Black British individuals based solely on ONS residence data. Since no subject address data is included in the Use of Force form, no comparison can be made between Essex residents and non-residents.

There is no readily available data to compare Essex with similar forces on a regular basis.

Effecting Arrest was the most used reason entered for officers using force, followed by Preventing Harm, Protecting Oneself and Protecting Other Officers. Please note, that more than one reason can be entered when justifying a Use of Force.

Reason for Force	Q1 2022/23	%age Reasons	%age Forms
Effect Arrest	3084	27.31%	52.52%
Prevent Harm	2974	26.33%	50.65%

Protect Self	2888	25.57%	49.18%
Protect Other Officers	2638	23.36%	44.93%
Prevent Escape	2553	22.61%	43.48%
Protect Subject	1674	14.82%	28.51%
Effect Search	1476	13.07%	25.14%
Prevent Offence	1474	13.05%	25.10%
Protect Public	1119	9.91%	19.06%
Remove Handcuffs	529	4.68%	9.01%
Secure Evidence	431	3.82%	7.34%
Other	293	2.59%	4.99%
Method Of Entry	74	0.66%	1.26%

Combining the reasons that encompass preventing harm as a whole², we can say that 53.3% of reasons are to prevent harm.

Impact Factor	Q1 2022/23	%age all Factors	%age Forms
Mental Health	2325	18.39%	49.61%
Alcohol	2244	17.74%	47.88%
Size/Gender/Build	1997	15.79%	42.61%
Prior Knowledge	1649	13.04%	35.18%
Drugs	1624	12.84%	34.65%
Other Factor	1344	10.63%	28.68%
Weapon	652	5.16%	13.91%
Crowd	554	4.38%	11.82%
Acute Behavioural Disorder	257	2.03%	5.48%

Each Use of Force form can have multiple impact factors, the table above shows the proportion of each impact factor in the total number of forms for the last quarter. Health is the highest impact factor, appearing on 49.6% of forms.

Qtr	Staff - injury level		Qtr	Subject - nature of injury	
	Minor	Severe		Minor	Severe
Q1 2020/21	218	5	Q1 2020/21	288	3
Q2 2020/21	290	5	Q2 2020/21	307	6
Q3 2020/21	178	5	Q3 2020/21	249	5
Q4 2020/21	207	1	Q4 2020/21	236	5
Q1 2021/22	240	6	Q1 2021/22	338	8
Q2 2021/22	245	4	Q2 2021/22	294	6
Q3 2021/22	205	2	Q3 2021/22	302	5
Q4 2021/22	183	4	Q4 2021/22	221	4
Q1 2022/23	194	2	Q1 2022/23	269	2

² Protect Self, Prevent Harm, Protect Other Officers, Protect Subject and Protect Public

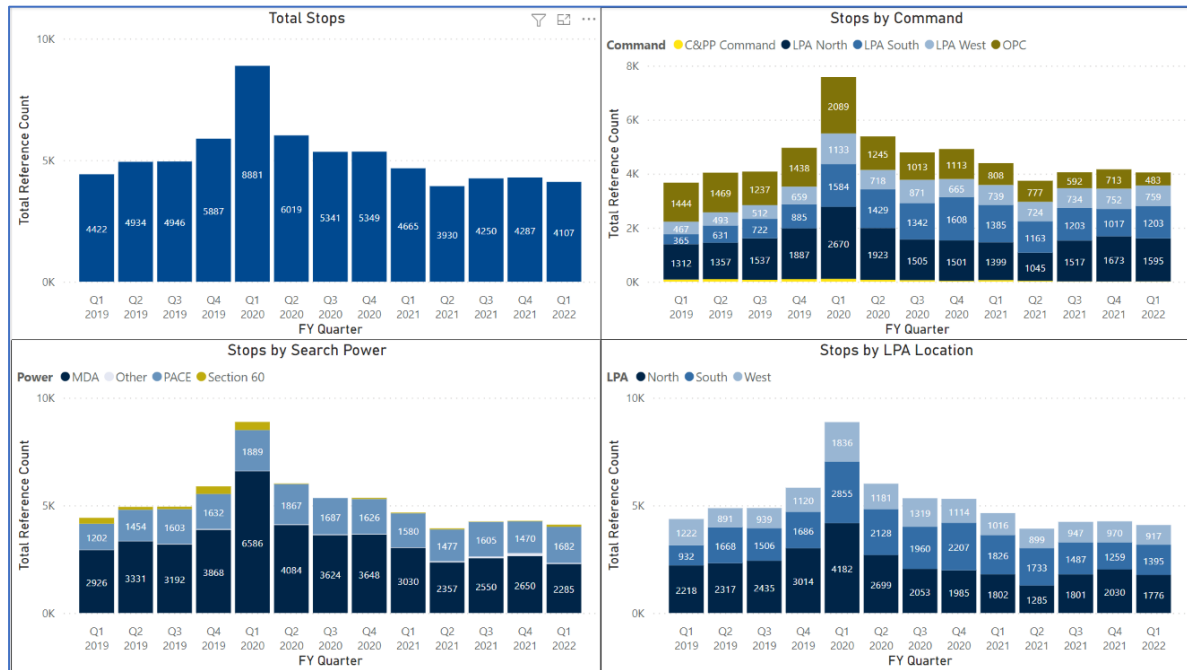

In the last quarter, Staff have been injured in 3.3% of incidents and Subjects have been injured in 4.6% of incidents. This is the same proportion of Staff injury as last quarter.

By calculating the number and severity of injuries that have occurred after each tactic type and then dividing that by the total use of each tactic, it is possible to ascertain the likelihood that the use of each tactic will result in either minor or severe injury.

Tactic	Likelihood of Leading to Minor Injury	Likelihood of Leading to Severe Injury
Baton used	60.0%	0.0%
Dog Bite	33.3%	0.0%
CS PAVA used	30.8%	2.6%
CS PAVA drawn	17.8%	0.0%
Baton drawn	13.0%	0.0%
Spit guard	11.1%	0.0%
Ground Restraint	10.5%	0.2%
Non-Compliant Handcuffing	9.7%	0.0%
Taser	9.0%	0.0%
Limb / Body Restraints	8.8%	0.2%
Unarmed skills	8.3%	0.1%
Other / improvised	8.3%	0.0%
Shield	7.1%	0.0%
Tactical Communication	6.6%	0.0%
Compliant Handcuffing	1.9%	0.0%
Dog Deployed	0.0%	0.0%
Firearms	0.0%	0.0%

As can be expected, Dog Bite and Baton used are highly likely to have caused injury in the last quarter. It is important to note the very low likelihood of Taser and Firearms tactics causing injury. There were 15 forms that detailed a Taser being fired and these led to seven injuries, therefore the likelihood of Taser firing leading to injury is 46.7% in the last quarter.

Stop and Search

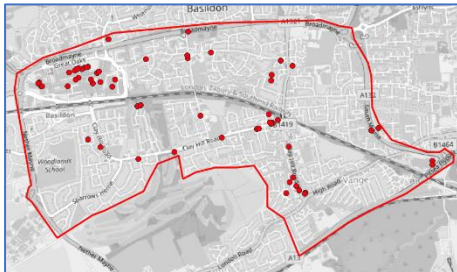

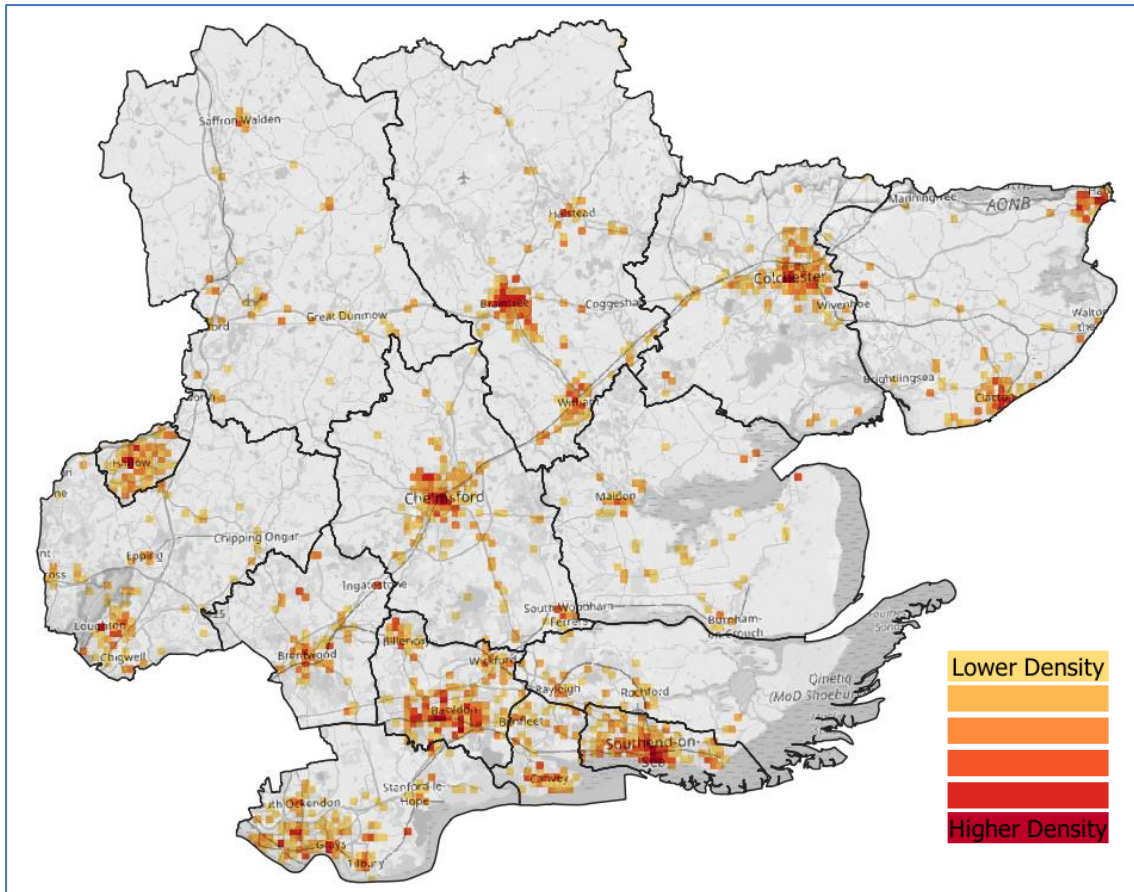

There were 4,107 stops recorded in Quarter 1 of 2022/23. This is a decrease of 4.2% (180 records) on the previous quarter and a 12.0% decrease (558 records) on the equivalent quarter last year. It seems likely that the volume of stops will continue at similar levels without an outside influence, such as a large operation or further pandemic restrictions, to drive volumes up or down.

96.6% (3,967) of stops in the last quarter were PACE and Misuse of Drugs Stops. There were 99 Section 60 Stops in Q1.

North LPA had most stops in the last quarter. Basildon has the highest volume of records this quarter with 691 followed by Uttlesford & Braintree with 559.

The majority of stops occurred in the main population centres of the county.

In the last quarter, there were three Section 60 authorisations throughout the county.

The Sec. 60 in Basildon was put in place on 5th April. This resulted in 74 Sec. 60 stops. The positive outcomes from these were three Verbal Warnings, two Community Resolutions and one Caution.

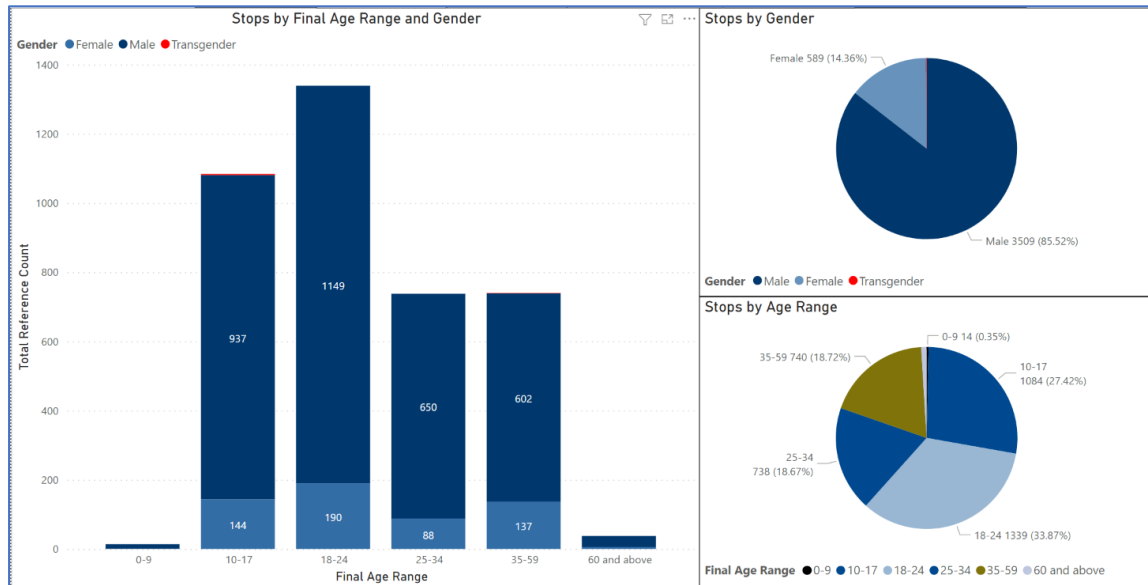

A Sec. 60 was put into place in Leigh-on-Sea/Westcliffe on 25th May. This resulted in seven Sec.60 stops. The positive outcomes of these stops were one Community Resolution and one Verbal Warning.

A Sec. 60 was put into place in Southend/Westcliff on 17th June. This resulted in 17 Sec. 60 stops. There were no positive outcomes from these stops.

One Sec.60 stop occurred in Chelmsford; this may be an officer error at the input stage.

86.6% of all stops last quarter were carried out by officers attached to the LPA Commands and a further 11.8% were carried out by officers from Operational Policing Command (OPC).

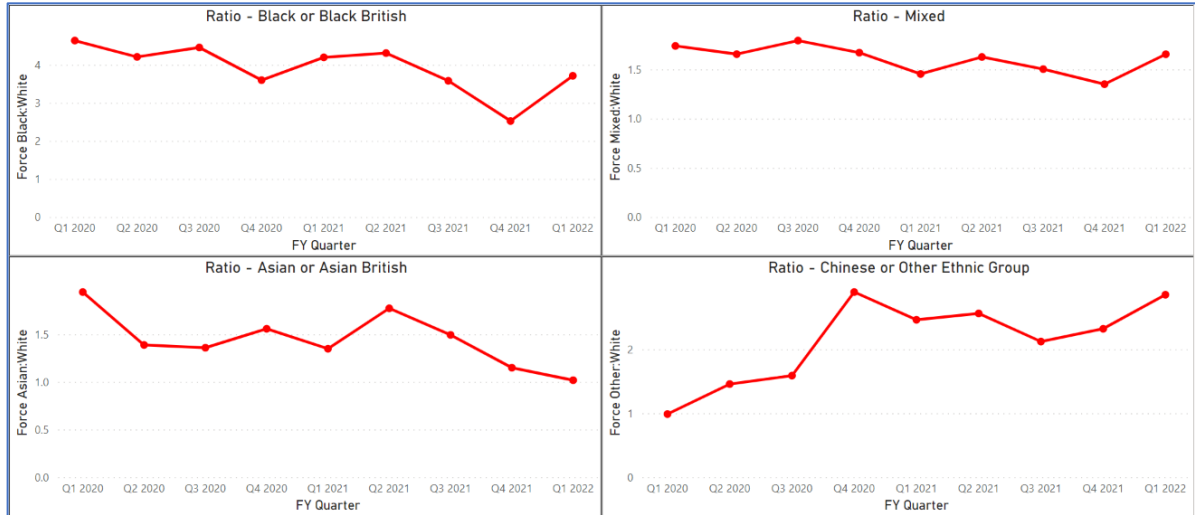

During Quarter 1 of 2022/23 and where there is age and gender data, 85.5% of subjects stopped were male with 18 – 24 being the most prevalent age group for both male and female subjects. The Modal age for male subjects is 19 and female subjects is 17.

	Stops per 1000 population					Ratio to White					
	White	Mixed	Asian or Asian British	Black or Black British	Chinese or Other Ethnic Group	Total Ethnic Minorities	Mixed	Asian or Asian British	Black or Black British	Chinese or Other Ethnic Group	Total Ethnic Minorities

Looking at the ethnic breakdown of Stop Searches for Q1 2022/23, an individual from an Ethnic Minority is 2.1 times more likely to be stopped than a White individual, this is a deterioration on the last quarter (1.7 times more likely). The above table shows a breakdown of stops per 1000 population and of the ratio of various ethnicities to White across the force. Black to White disproportionality is highest in the North LPA and lowest in the West LPA.

For records in which it is possible to ascertain that the subject is an Essex resident³, the disproportionality ratios fall by an average of 41.1%. An Essex Resident from an Ethnic Minority is 1.2 time more likely to be stopped than a White Resident compared to 2.1 times for all individuals stopped.

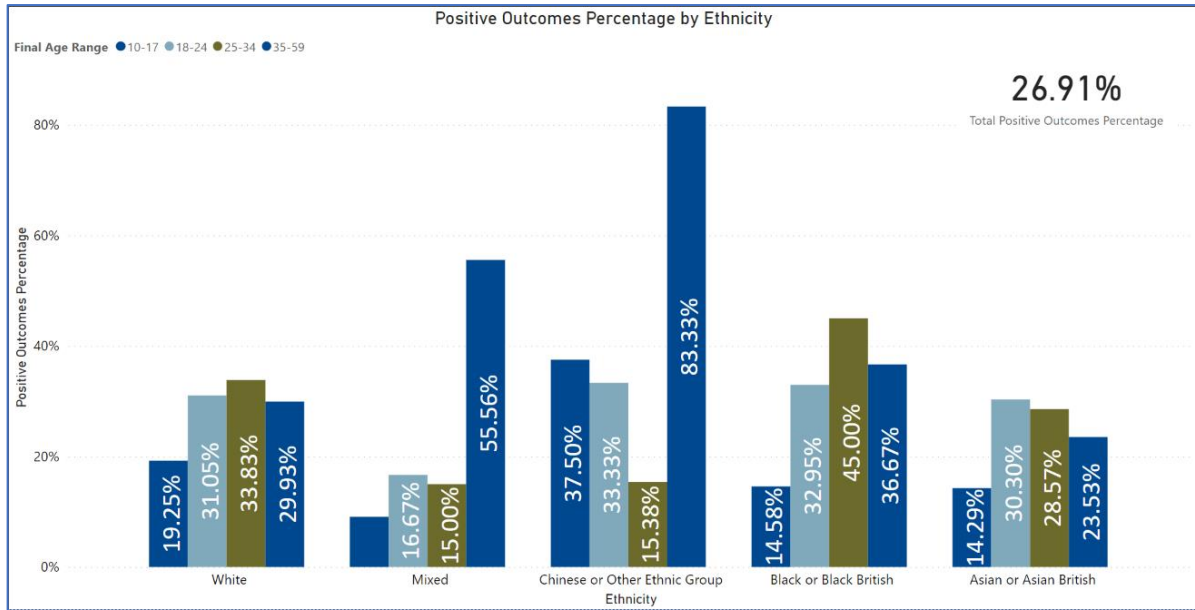

The Ethnicity to White ratio can be tracked over time. The ratios for Black, Asian and Mixed ethnicities show a downward trend over past two years, however, there has been a recent uptick in the Black and Mixed ratios.

County	Ratio Ethnic Minority:White (White =1)	County	Ratio Black:White (White =1)
Derbyshire	3.21	Sussex	9.03
Staffordshire	2.80	Hampshire	6.11
Sussex	2.77	Derbyshire	5.97
Avon & Somerset	2.53	Leicestershire	4.94
Hertfordshire	2.44	Avon & Somerset	4.91
Essex	2.09	Hertfordshire	4.61
Hampshire	1.92	Staffordshire	4.21
Leicestershire	1.63	Essex	3.22

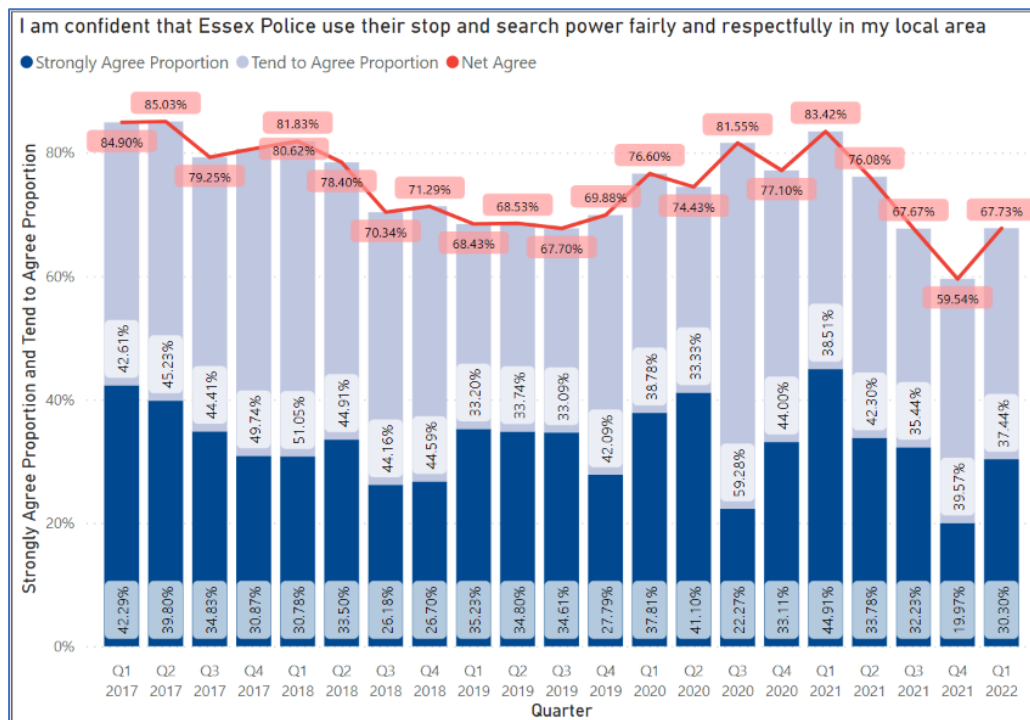

Data from the Police.uk website can be used to compare Essex Police to its Most Similar Group of forces. This data is based on a six-month period December 2021 – May 2022. Essex has the third lowest Ethnic Minority to White ratio and the lowest Black to White ratio.

³ This is done by matching the town of residence or postcode with lists of towns and postcodes in Essex. Whilst the quality of the data is not perfect and subject to input errors, it is unlikely that the error is significant.

Whilst there is no country-wide definition as to what counts as a Positive outcome for Stop Search, Police.uk uses all outcomes apart from “A no further action disposal⁴.” The above chart shows data for Q1 broken down by ethnicity and age group.

For Q1 2022/23, 26.9% of Essex outcomes were positive which is slightly lower than the previous quarter (29.0%). The Most Similar Group of Forces average positive outcome rate is 28.7%. During the last quarter Positive outcomes on individuals from Ethnic Minorities were 0.5 percentage point higher than for White individuals.

⁴ This now includes the outcomes “Other”, “Verbal Warning” and “Article found - detailed outcome unavailable”

Data from SMSR shows that the previously reported decline in confidence may have been addressed. There has been an uptick in those that agree that Essex Police use Stop and Search fairly. The net agreement proportion of 67.7% in Q1 is higher than the previous quarter but still well below the 83.4% of the same quarter last year. Results for respondents from Ethnic Minorities shows a drop to 52.6% agreement. The proportion of Ethnic Minority respondents who actively disagree with the statement has risen slightly from 12.4% to 15.8% quarter-on-quarter.

In the last quarter, there were 46 searches that involved the removal of more than just outer garments or the exposure of the intimate parts of the subject – colloquially known as Strip Searches. This is 12 more than the previous quarter.

Outcome	Female			Male				Grand Total
	18-24	25-34	35-59	10-17	18-24	25-34	35-59	
Arrests		1			5	2		8
Caution					1	3		4
Community resolution				2		4	1	7
No further action	1	1	4		6	7	2	21
Other action			1	1		1	2	5
Voluntary attendance			1					1
Grand Total	1	2	6	3	12	17	5	46

The above table shows these searches broken down by gender, age and outcome. The positive outcome rate for these searches was 43.5%. There were three searches carried out on an individual under the age of 18, these were all under the Misuse of Drugs Act.

The Independent Stop and Search BWV Panel consists of a diverse group of committed IAGs members from around the county and has been meeting bi-monthly since July 2021. The Panel review non-redacted BWV footage of Essex Police officers stop and search interactions, scoring them against a Procedural Justice framework so that the effectiveness and fairness of search activity can be monitored. The feedback from the Panel is shared with individual officers and organisational learning is captured through the Learning the Lessons Board via the Stop and Search Tactical Board. Any concerns regarding the conduct of the officers involved is assessed by the respective Appropriate Authority (Departmental Superintendent) to ensure a consistent approach between reflective practice and misconduct.

6.0 Implications (Issues)

The continued rise in Mental Health as an impact factor suggests a process change in the way that officers are recording this on forms, although it is not yet clear why this has occurred.

Although the disproportionality between White and Ethnic Minorities that are subject to stop and search is a concern, the gap has narrowed over the past 12 months despite a rise this quarter. It is important that Essex Police understands and can articulate the reasons behind this data.

6.1 Links to Police and Crime Plan Priorities

The use of force is a cross-cutting issue that impacts on many areas in the Police and Crime Plan.

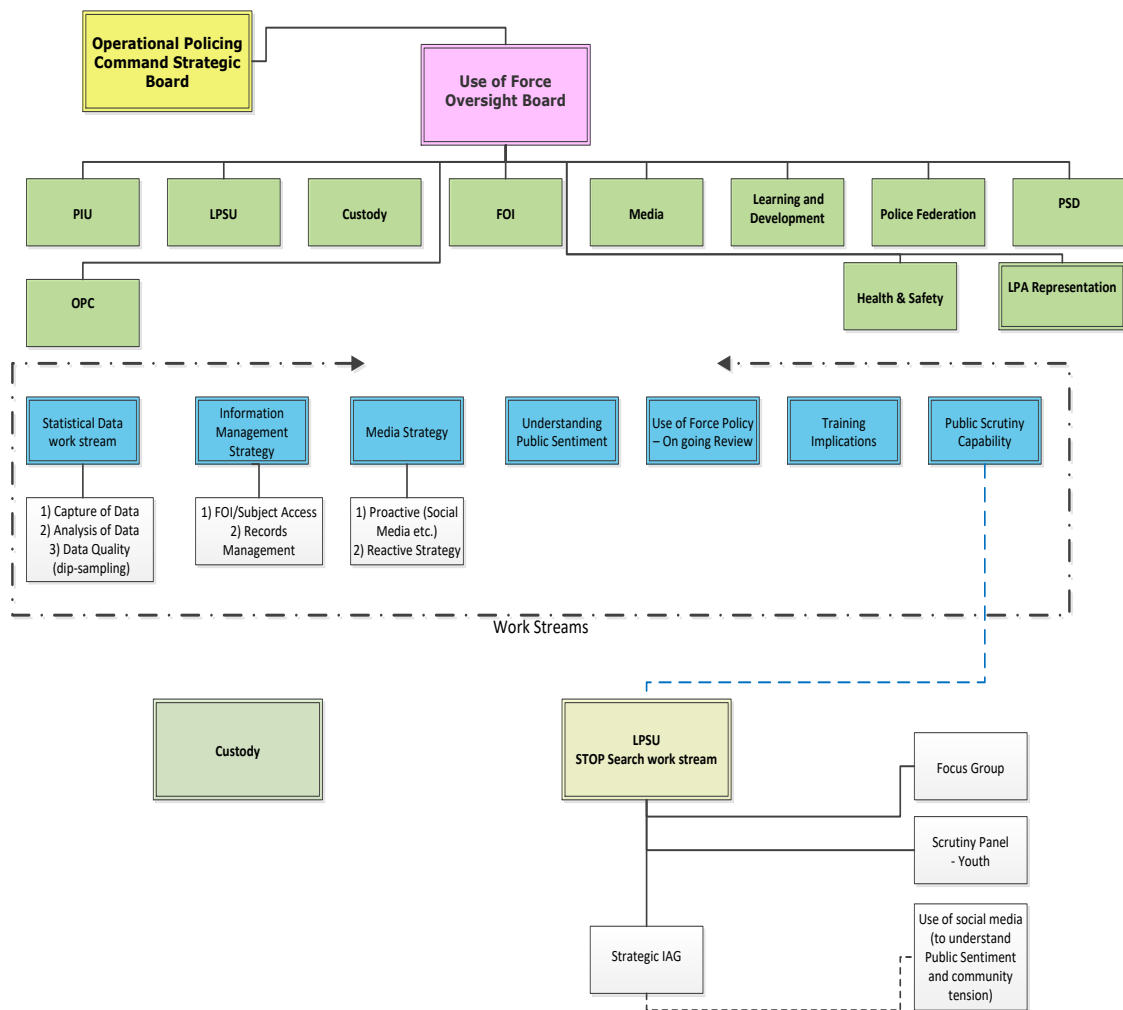

6.2 Demand

The trends in volumes of use of force and stop & search have been described throughout the paper.

6.3 Risks/Mitigation

Use of force is monitored by the 'Use of Force Board' chaired by T/ACC Glen Pavelin. These meetings are held on a quarterly basis. This group is a force-wide focus group facilitated and organised by the Operational Policing Command (OPC) and is intended to provide formal scrutiny and consultative feedback on the use of force and all its associated issues. The Use of Force Board focuses on enabling the force to examine and improve on statistical data-gathering and its analysis, and transparency with the public in order to improve confidence and trust in Essex Police.

Representation within the Use of Force Board comprises a number of disciplines, as detailed in the below structure:

6.4 Equality and/or Human Rights Implications

The above analysis indicates an ethnic disparity in both Use of Force and Stop Search. Recently, ONS have released 2019 mid-year estimates and this is the first version of this report that uses that data.

Subjects from Ethnic Minorities are twice as likely to be stopped that White subjects.

Essex Police has established a Stop and Search / Use of Force Review Panel made up of members of the public representing a number of diverse communities. This Panel reviews Body Worn Video (BWV) footage of Stop and Searches as well as incidents where force is used. Feedback from the Panel is provided to the officers and their line managers.

Each of the Local Policing Areas and Operational Policing Command review BWV footage of their officers carrying out Stop and Searches and / or Use of Force.

6.5 Health and Safety Implications

The appropriate use of force and the level of threat faced by operational officers and staff have health and safety implication for those involved including subjects, the police and the public. Any patterns or concerns are discussed and acted upon at the Use of Force Board.

7.0 Consultation/Engagement

Nothing to note beyond the fact that the force continues to share and discuss use of force and stop and search data with the various IAGs around the county.

8.0 Actions for Improvement

- The Essex Police Refreshed Approach to Stop and Search training has been delivered to all LPT officers across the force during the 2022 FLEX training and this is designed to improve the communication skills of our officers when conducting stop and search; treating people fairly, with respect and ensuring each stop and search interaction is closed in a positive manner.
- Stop and Search policy and procedure is being updated to reflect Authorised Professional Practice (APP) around the use of Exposure of Intimate Part (EIP) searches (strip searches) and the searching of/by Transgender individuals.

9.0 Future Work/Development

- External media campaign to be used to increase the confidence of the public in our use of stop and search powers. This campaign will not only highlight why and how we use our powers but also the work of the Independent BWV Review Panel which provides community scrutiny and feedback on officers stop and search activity. There have been some delays to the progress of this campaign however the campaign strategy has now been written and plans are in place to deliver this quarter.

- The Procedural Justice Framework is delivered to Student Officers as part of the stop and search training however a more bespoke package is being developed as part of a trial project. Procedural Justice is about making fair decisions and treating people with respect which dovetails with our Refreshed Approach to Stop and Search training.
- The Essex Police Professional Standards Department are updating the stop and search section of the Essex Police website to include case study examples where Essex Police have captured learning from complaints relating to stop and search and use of force and used this learning to develop our working practices.
